Title Index to Volume 8

Air Photos for Soil Survey in Lowland England: Factors Affecting the Photographic Images of Bare Soils and Their Relevance to Assessing Soil Moisture Content and Discrimination of Soils by Remote Sensing (Evans): 39

Albedo of Vegetated Surfaces: Its Variability with Differing Irradiances (Kriebel): 283

Bidirectional Reflectance of Crops and the Soil Contribution (Rao, Brach, and Mack): 115

A Coastal Radar System for Tsunami Warning (Barrick): 353

The Computation of Ocean Wave Heights From GEOS-3 Satellite Radar Altimeter Data (Gower): 97

Equivalence of Airborne and Ground-Acquired Wheat Canopy Temperatures (Millard, Hatfield, and Goettelman): 273

Estimating Leaf-Area Index of Wheat with LANDSAT Data (Pollock and Kanemasu): 307

A Factor Analysis Approach to Optimal Selection of Spectral Intervals for Multipurpose Experiments in Remote Sensing of the Environment and Earth Resources (Kondratyev and Pokrovsky): 1

Grain Yield Prediction: Extending the Stress–Degree-Day Approach to Accommodate Climatic Variability (Idso, Hatfield, Jackson, and Reginato): 267

GT Index: A Measure of the Success of Prediction (Türk): 65

Identification and Area Estimation of Agricultural Crops by Computer Classification of LANDSAT MSS Data (Bauer, Cipra, Anuta, and Etheridge): 77

The Influence of False Color Infrared Display on Training Field Identification (Coberly, Tubbs, and Odell): 225

LANDSAT Test of Diffuse Reflectance Models for Aquatic Suspended Solids Measurement (Munday and Alföldi): 169

Measured Emissivity of Soils in the Southeast United States (Taylor): 359

Monitoring Corn and Soybean Crop Development with Hand-Held Radiometer Spectral Data (Tucker, Elgin, McMurtrey, and Fan): 237

Monitoring of Euphotic Depth from Aircraft (Sørensen and Maracci): 349

Red and Photographic Infrared Linear Combinations for Monitoring Vegetation (Tucker): 127

Remotely Sensed Land Cover Temperature and Soil Water Status—A Brief Review (Byrne, Begg, Fleming, and Dunin): 291

Rational Land Use Decision-Making: The Natchez State Park (Miller and Carter): 11

Simultaneous Use of Geological, Geophysical, and LANDSAT Data in Uranium Exploration (Missallati, Prelat, and Lyon): 189

Snow Parameter Determination by Multichannel Microwave Radiometry (Hofer and Good): 211

Spectral Reflectance Changes Accompanying a Post-Fire Recovery Sequence in a Subarctic Spruce Lichen Woodland (Fuller and Rouse): 3

A Study of Moisture Conditions in the Pantanal of Brazil Using Satellite Imagery (Darch): 331

The Thermal Inertia Approach to Mapping of Soil Mositure and Geology (Pratt and Ellyett): 151

The Use of Polarized Panchromatic and False Color Infrared Film in the Monitoring of Soil Surface Moisture (Curran): 249

Use of Satellite Infrared Data for Geomorphology Studies (Schneider, McGinnis, and Pritchard): 313
